

Start up the monitor

- 1) Switch on the monitor using the toggle switch on the socket. A menu for setting the time may appear. This will disappear automatically after approx. 1 minute.
- 2) Switch on the PC.
- 3) Connect the HDMI cable to the PC.
The image should now be duplicated on the monitor.

Switch off the monitor

- 1) Remove the HDMI cable from the PC and wind it up on the cable hook.
- 2) Switch off the monitor using the toggle switch on the socket.

Please note:

- No adapters for adapting the HDMI connection to other connections (e.g. VGA) can be borrowed from the library. If your device does not have an HDMI connection, you must provide an appropriate adapter yourself.
- The library staff cannot provide technical support for the use of the monitor or advise you on its use. Please follow these instructions, if you wish to use the device.
- Malfunctions of the monitor can be reported to the staff of the University Library so that we can restore the device to working order.
